# VOLUME CONTENTS

**Volume 51, Issue 1, January 2006**

Original Articles

1 *Evelyn Habit, Mark C. Belk, R. Cary Tuckfield and Oscar Parra:* Response of the fish community to human-induced changes in the Biobío River in Chile

12 *Peter J. Smith, S. Margaret McVeagh and Kevin J. Collier:* Genetic diversity and historical population structure in the New Zealand mayfly *Acanthophlebia cruentata*

25 *David L. Strayer, Heather M. Malcom, Robin E. Bell, Suzanne M. Carbotte and Frank O. Nitsche:* Using geophysical information to define benthic habitats in a large river

39 *A. E. Hershey, S. Beaty, K. Fortino, M. Keyse, P. P. Mou, W. J. O'Brien, A. J. Ulseth, G. A. Gettel, P. W. Lienesch, C. Luecke, M. E. McDonald, C. H. Mayer, M. C. Miller, C. Richards, J. A. Schuldt and S. C. Whalen:* Effect of landscape factors on fish distribution in arctic Alaskan lakes

56 *Leah A. Bêche, Eric P. McElravy and Vincent H. Resh:* Long-term seasonal variation in the biological traits of benthic-macroinvertebrates in two Mediterranean-climate streams in California, U.S.A.

76 *Bianca Wohlfahrt, Dirk Johannes Mikolajewski, Gerrit-Joop and Frank Suhling:* Are behavioural traits in prey sensitive to the risk imposed by predatory fish?

85 *S. A. Miller and T. A. Crowl:* Effects of common carp (*Cyprinus carpio*) on macrophytes and invertebrate communities in a shallow lake

95 *Lone Liboriussen and Erik Jeppesen:* Structure, biomass, production and depth distribution of periphyton on artificial substratum in shallow lakes with contrasting nutrient concentrations

110 *Tjisse van der Heide, Rudi M. M. Roijackers, Edwin T. H. M. Peeters and Egbert H. van Nes:* Experiments with duckweed–moth systems suggest that global warming may reduce rather than promote herbivory

117 *David L. Strayer and Heather M. Malcom:* Long-term demography of a zebra mussel (*Dreissena polymorpha*) population

131 *Miguel Alvarez-Cobelas, Carmen Rojo, José Luis Velasco and Angel Baltanás:* Factors controlling planktonic size spectral responses to autumnal circulation in a Mediterranean lake

Applied Issues

144 *Barbara J. Downes, P. S. Lake, Alena Glaister and Nicholas R. Bond:* Effects of sand sedimentation on the macroinvertebrate fauna of lowland streams: are the effects consistent?

161 *Tina Charlotte Moustgaard Pedersen, Annette Baattrup-Pedersen and Tom Vindbæk Madsen:* Effects of stream restoration and management on plant communities in lowland streams

180 *Renata A. Kowalik and S. J. Ormerod:* Intensive sampling and transplantation experiments reveal continued effects of episodic acidification on sensitive stream invertebrates

**Volume 51, Issue 2, February 2006**

Original Articles

193 *Phillip C. Watts, Ilik J. Saccheri, Stephen J. Kemp and David J. Thompson:* Population structure and the impact of regional and local habitat isolation upon levels of genetic diversity of the endangered damselfly *Coenagrion mercuriale* (Odonata: Zygoptera)

206 *Samantha J. Capon and Margaret A. Brock:* Flooding, soil seed bank dynamics and vegetation resilience of a hydrologically variable desert floodplain

224 *Julia M. McCarthy, Catherine L. Hein, Julian D. Olden and M. Jake Vander Zanden:* Coupling long-term studies with meta-analysis to investigate impacts of non-native crayfish on zoobenthic communities

236 *Ian D. Hogg, Mark I. Stevens, Kareen E. Schnabel and M. Ann Chapman:* Deeply divergent lineages of the widespread New Zealand amphipod *Paracalliope fluviatilis* revealed using allozyme and mitochondrial DNA analyses

249 *Peter A. Staehr and Kaj Sand-Jensen:* Seasonal changes in temperature and nutrient control of photosynthesis, respiration and growth of natural phytoplankton communities

263 *Cristiana Callieri, Emanuele Caravati, Giuseppe Morabito and Alessandro Oggioni:* The unicellular freshwater cyanobacterium *Synechococcus* and mixotrophic flagellates: evidence for a functional association in an oligotrophic, subalpine lake

274 *Tenna Riis and Kaj Sand-Jensen:* Dispersal of plant fragments in small streams

287 *D. Schleuter and R. Eckmann:* Competition between perch (*Perca fluviatilis*) and ruffe (*Gymnocephalus cernuus*): the advantage of turning night into day

298 *Alexander Eiler, Jan A. Olsson and Stefan Bertilsson:* Diurnal variations in the auto- and heterotrophic activity of cyanobacterial phycospheres (*Gloeotrichia echinulata*) and the identity of attached bacteria

312 *Michael Effenberger, Gabriele Sailer, Colin R. Townsend and Christoph D. Matthaei:* Local disturbance history and habitat parameters influence the microdistribution of stream invertebrates

Applied Issues

333 *Marc J. Mazerolle, Monique Poulin, Claude Lavoie, Line Rochefort, André Desrochers and Bruno Drolet:* Animal and vegetation patterns in natural and man-made bog pools: implications for restoration

351 *F. Ayllon, P. Moran and E. Garcia-Vazquez:* Maintenance of a small anadromous subpopulation of brown trout (*Salmo trutta* L.) by straying

359 *John Van Sickle, David D. Huff and Charles P. Hawkins:* Selecting discriminant function models for predicting the expected richness of aquatic macroinvertebrates

373 *Alexander M. Milner, Sarah C. Conn and Lee E. Brown:* Persistence and stability of macroinvertebrate communities in streams of Denali National Park, Alaska: implications for biological monitoring

388 *Keith H. Nislow and Winsor H. Lowe:* Influences of logging history and riparian forest characteristics on macroinvertebrates and brook trout (*Salvelinus fontinalis*) in headwater streams (New Hampshire, U.S.A.)

**Volume 51, Issue 3, March 2006**

Original Articles

399 *Joachim Mergeay, Steven Declerck, Dirk Verschuren and Luc De Meester:* *Daphnia* community analysis in shallow Kenyan lakes and ponds using dormant eggs in surface sediments

412 *Luis Schiesari:* Pond canopy cover: a resource gradient for anuran larvae

424 *Irene van der Stap, Matthijs Vos and Wolf M. Mooij:* Linking herbivore-induced defences to population dynamics

435 *Trent M. Hoover, John S. Richardson and Noboru Yonemitsu:* Flow-substrate interactions create and mediate leaf litter resource patches in streams

448 *Donald A. Yee and Steven A. Juliano:* Consequences of detritus type in an aquatic microsystem: effects on water quality, micro-organisms and performance of the dominant consumer

460 *Jeanette K. Howard and Kurt M. Cuffey:* The functional role of native freshwater mussels in the fluvial benthic environment

475 *Allison A. Pease, J. Justine Davis, Melanie S. Edwards and Thomas F. Turner:* Habitat and resource use by larval and juvenile fishes in an arid-land river (Rio Grande, New Mexico)

487 *John E. Havel and Winfried Lampert:* Habitat partitioning of native and exotic *Daphnia* in gradients of temperature and food: mesocosm experiments

499 *Melody J. Bernot, Jennifer L. Tank, Todd V. Royer and Mark B. David:* Nutrient uptake in streams draining agricultural catchments of the midwestern United States

510 *Johanna Öhman, Ishi Buffam, Göran Englund, Andreas Blom, Emma Lindgren and Hjalmar Laudon:* Associations between water chemistry and fish community composition: a comparison between isolated and connected lakes in northern Sweden

523 *Joshua J. Latterell, J. Scott Bechtold, Thomas C. O'Keefe, Robert Van Pelt and Robert J. Naiman:* Dynamic patch mosaics and channel movement in an unconfined river valley of the Olympic Mountains

545 *C. Presa Abós, F. Lepori, B. G. McKie and B. Malmqvist:* Aggregation among resource patches can promote coexistence in stream-living shredders

554 *Gabi Mulderij, Alfons J. P. Smolders and Ellen Van Donk:* Allelopathic effect of the aquatic macrophyte, *Stratiotes aloides*, on natural phytoplankton

Applied Issues

562 *Peter G. Langdon, Zoe Ruiz, Klaus P. Brodersen and Ian D. L. Foster:* Assessing lake eutrophication using chironomids: understanding the nature of community response in different lake types

578 *David T. Bilton, Louise McAbendroth, Alan Bedford and Paul M. Ramsay:* How wide to cast the net? Cross-taxon congruence of species richness, community similarity and indicator taxa in ponds

Opinion

591 *John K. Jackson and Leopold Füreder:* Long-term studies of freshwater macroinvertebrates: a review of the frequency, duration and ecological significance

604 Book Review

**Volume 51, Issue 4, April 2006**

Original Articles

605 *Carri J. LeRoy and Jane C. Marks:* Litter quality, stream characteristics and litter diversity influence decomposition rates and macroinvertebrates

618 *Marcelo Ardón, Lindsay A. Stallcup and Catherine M. Pringle:* Does leaf quality mediate the stimulation of leaf breakdown by phosphorus in Neotropical streams?

634 *Pieter T. J. Johnson, Joyce E. Longcore, Daniel E. Stanton, Ryan B. Carnegie, Jeffrey D. Shields and Eric R. Preu:* Chytrid infections of *Daphnia pulicaria*: development, ecology, pathology and phylogeny of *Polycaryum laeve*

649 *Xuejia He and Wen-Xiong Wang:* Releases of ingested phytoplankton carbon by *Daphnia magna*

666 *M. Henry, H. Stevens and Claire E. Steiner:* Effects of predation and nutrient enrichment on a food web with edible and inedible prey

672 *Jani Heino and Janne Soininen:* Regional occupancy in unicellular eukaryotes: a reflection of niche breadth, habitat availability or size-related dispersal capacity?

686 *Tatjana Simčič and Anton Brancelj:* Effects of pH on electron transport system (ETS) activity and oxygen consumption in *Gammarus fossarum*, *Asellus aquaticus* and *Niphargus sphagnicolus*

695 *Nils O. L. Carlsson and Christer Brönmark:* Size-dependent effects of an invasive herbivorous snail (*Pomacea canaliculata*) on macrophytes and periphyton in Asian wetlands

705 *Carolyn L. Faithfull and Carolyn W. Burns:* Effects of salinity and source of inocula on germination of *Anabaena* akinetes from a tidally influenced lake

717 *Andrew K. Sharpe and Barbara J. Downes:* The effects of potential larval supply, settlement and post-settlement processes on the distribution of two species of filter-feeding caddisflies

730 *Cecilia Mille-Lindblom, Helmut Fischer and Lars J. Tranvik:* Litter-associated bacteria and fungi – a comparison of biomass and communities across lakes and plant species

742 *Stephanie M. Carman, John Janssen, David J. Jude and Martin B. Berg:* Diel interactions between prey behaviour and feeding in an invasive fish, the round goby, in a North American river

756 *Jacobus Vijverberg and Matthijs Vos:* Predator-released compounds, ambient temperature and competitive exclusion among differently sized *Daphnia* species

Applied Issues

768 *Michelle F. Bowman, Keith M. Somers, R. A. Reid and L. D. Scott:* Temporal response of stream benthic macroinvertebrate communities to the synergistic effects of anthropogenic acidification and natural drought events

783 *Jill Lancaster and Lisa R. Belyea:* Defining the limits to local density: alternative views of abundance–environment relationships

938 *Urs Uehlinger:* Annual cycle and inter-annual variability of gross primary production and ecosystem respiration in a floodprone river during a 15-year period

Applied issues

951 *Jocelyn Dela-Cruz, Tim Pritchard, Geoffrey Gordon and Penelope Ajani:* The use of periphytic diatoms as a means of assessing impacts of point source inorganic nutrient pollution in south-eastern Australia

973 *Michele A. Burford and Mark J. O'Donohue:* A comparison of phytoplankton community assemblages in artificially and naturally mixed subtropical water reservoirs

983 Erratum

984 Corrigendum

986 Corrigendum

**Volume 51, Issue 5, May 2006**

Original Articles

797 *Carl R. Ruetz III, Matthew J. Breen and Dana L. VanHaitsma:* Habitat structure and fish predation: effects on invertebrate colonisation and breakdown of stream leaf packs

807 *Kristiina Vuorio, Markus Meili and Jouko Sarvala:* Taxon-specific variation in the stable isotopic signatures ($\delta^{13}C$ and $\delta^{15}N$) of lake phytoplankton

823 *Z. Maciej Gliwicz, Jarosław Słon and Iwona Szynkarczyk:* Trading safety for food: evidence from gut contents in roach and bleak captured at different distances offshore from their daytime littoral refuge

840 *Christiane Ilg and Emmanuel Castella:* Patterns of macroinvertebrate traits along three glacial stream continuums

854 *Jonathan A. O'Donnell and Jeremy B. Jones Jr:* Nitrogen retention in the riparian zone of catchments underlain by discontinuous permafrost

865 *Ole Pedersen, Troels Andersen, Kou Ikejima, Md Zakir Hossain and Frede Østergaard Andersen:* A multidisciplinary approach to understanding the recent and historical occurrence of the freshwater plant, *Littorella uniflora*

878 *Willem Goedkoop, Nina Åkerblom and Marnie H. Demandt:* Trophic fractionation of carbon and nitrogen stable isotopes in *Chironomus riparius* reared on food of aquatic and terrestrial origin

887 *Jonas Persson and Tobias Vrede:* Polyunsaturated fatty acids in zooplankton: variation due to taxonomy and trophic position

901 *Stéphanie Boulêtreau, Frédéric Garabétian, Sabine Sauvage and José-Miguel Sánchez-Pérez:* Assessing the importance of a self-generated detachment process in river biofilm models

913 *J.M. Elliott:* Prey switching in *Rhyacophila dorsalis* (Trichoptera) alters with larval instar

925 *Andreas Kleeberg, Hendrik Schubert, Matthias Koschorreck and Brigitte Nixdorf:* Abundance and primary production of filamentous green algae *Zygogonium ericetorum* in an extremely acid (pH 2.9) mining lake and its impact on alkalinity generation

**Volume 51, Issue 6, June 2006**

Original Articles

989 *Rafael Morales-Baquero, Presentación Carrillo, José Barea-Arco, Carmen Pérez-Martínez and Manuel Villar-Argaiz:* Climate-driven changes on phytoplankton–zooplankton coupling and nutrient availability in high mountain lakes of Southern Europe

999 *T. A. Warnaars and M. Hondzo:* Small-scale fluid motion mediates growth and nutrient uptake of *Selenastrum capricornutum*

1016 *Daniel E. Spooner and Caryn C. Vaughn:* Context-dependent effects of freshwater mussels on stream benthic communities

1025 *Victor F. V. Pazin, William E. Magnusson, Jansen Zuanon and Fernando P. Mendonça:* Fish assemblages in temporary ponds adjacent to 'terra-firme' streams in Central Amazonia

1038 *Milla Rautio and Warwick F. Vincent:* Benthic and pelagic food resources for zooplankton in shallow high-latitude lakes and ponds

1053 *Jill Lancaster, Thomas Buffin-Bélanger, Ian Reid and Stephen Rice:* Flow- and substratum-mediated movement by a stream insect

1070 *Kevin L. Pangle and Scott D. Peacor:* Non-lethal effect of the invasive predator *Bythotrephes longimanus* on *Daphnia mendotae*

1079 *Annette L. Schloss and James F. Haney:* Clouds, shadows or twilight? Mayfly nymphs recognise the difference

1090 *Jari Syväranta, Heikki Hämäläinen and Roger I. Jones:* Within-lake variability in carbon and nitrogen stable isotope signatures

1103 *Achim Paetzold, Jacqueline F. Bernet and Klement Tockner:* Consumer-specific responses to riverine subsidy pulses in a riparian arthropod assemblage

1116 *Johanna Laybourn-Parry, Nanette J. Madan, William A. Marshall, Harvey J. Marchant and Simon W. Wright:* Carbon dynamics in an ultra-oligotrophic epishelf lake (Beaver Lake, Antarctica) in summer

1131 *Roderick L. Oliver and Chester J. Merrick:* Partitioning of river metabolism identifies phytoplankton as a major contributor in the regulated Murray River (Australia)

1149 *Elanor M. Bell, Guytram Weithoff and Ursula Gaedke:* Temporal dynamics and growth of Actinophrys sol (Sarcodina: Heliozoa), the top predator in an extremely acidic lake

1162 *Frank M. Wilhelm, Steven J. Taylor and Ginny L. Adams:* Comparison of routine metabolic rates of the stygobite, *Gammarus acherondytes* (Amphipoda: Gammaridae) and the stygophile, *Gammarus troglophilus*

Applied Issues

1175 *A. Almodóvar, G. G. Nicola, B. Elvira and J. L. García-Marín:* Introgression variability among Iberian brown trout Evolutionary Significant Units: the influence of local management and environmental features

1188 Corrigendum

**Volume 51, Issue 7, July 2006**

Special Review

1189 *Christian E. W. Steinberg, Sheku Kamara, Valeria Yu. Prokhotskaya, Levonas Manusadžianas, Tatyana A. Karasyova, Maxim A. Timofeyev, Zhang Jie, Andrea Paul, Thomas Meinelt, Vinicius F. Farjalla, Aline Y. O. Matsuo, B. Kent Burnison and Ralph Menzel:* Dissolved humic substances – ecological driving forces from the individual to the ecosystem level?

Original Articles

1211 *Jason K. Walter, Robert E. Bilby and Brian R. Fransen:* Effects of Pacific salmon spawning and carcass availability on the caddisfly *Ecclisomyia conspersa* (Trichoptera: Limnephilidae)

1219 *Alla Alster, Zvy Dubinsky and Tamar Zohary:* Encystment of Peridinium gatunense: occurrence, favourable environmental conditions and its role in the dinoflagellate life cycle in a subtropical lake

1229 *Lien L. Sim, Jenny A. Davis, Jane M. Chambers and Karin Strehlow:* What evidence exists for alternative ecological regimes in salinising wetlands?

1249 *Stephanie M. Parker and Alexander D. Huryn:* Food web structure and function in two arctic streams with contrasting disturbance regimes

1264 *J. Nedoma, J. C. García, M. Comerma, K. Šimek and J. Armengol:* Extracellular phosphatases in a Mediterranean reservoir: seasonal, spatial and kinetic heterogeneity

1277 *Tomas Brodin, Frank Johansson and Johannes Bergsten:* Predator related oviposition site selection of aquatic beetles (*Hydroporus* spp.) and effects on offspring life-history

1286 *Nicholas Azza, Patrick Denny, Johan van de Koppel and Frank Kansiime:* Floating mats: their occurrence and influence on shoreline distribution of emergent vegetation

1298 *Anders Persson and Jonas M. Svensson:* Effects of benthivorous fish on biogeochemical processes in lake sediments

1310 *Caitriona M. Maguire and Jonathan Grey:* Determination of zooplankton dietary shift following a zebra mussel invasion, as indicated by stable isotope analysis

1320 *Mariana Meerhoff, Claudia Fosalba, Carla Bruzzone, Néstor Mazzeo, Willemijn Noordoven and Erik Jeppesen:* An experimental study of habitat choice by *Daphnia*: plants signal danger more than refuge in subtropical lakes

1331 *Hanne Dalsgaard Nielsen, Søren Laurentius Nielsen and Tom Vindbæk Madsen:* $CO_2$ uptake patterns depend on water current velocity and shoot morphology in submerged stream macrophytes

1341 *Zoltán Csabai, Pál Boda, Balázs Bernáth, György Kriska and Gábor Horváth:* A 'polarisation sun-dial' dictates the optimal time of day for dispersal by flying aquatic insects

1351 *Eduardo M. García-Roger, María José Carmona and Manuel Serra:* Hatching and viability of rotifer diapausing eggs collected from pond sediments

1359 *Damian H. Bubb, Timothy J. Thom and Martyn C. Lucas:* Movement, dispersal and refuge use of co-occurring introduced and native crayfish

Applied Issues

1369 *N. Gouin, F. Grandjean and C. Souty-Grosset:* Population genetic structure of the endangered crayfish *Austropotamobius pallipes* in France based on microsatellite variation: biogeographical inferences and conservation implications

**Volume 51, Issue 8, August 2006**

Special Review

1389 *D. Caissie:* The thermal regime of rivers: a review

Original Articles

1407 *D. G. George, V. A. Bell, J. Parker and R. J. Moore:* Using a 1-D mixing model to assess the potential impact of year-to-year changes in weather on the habitat of vendace (*Coregonus albula*) in Bassenthwaite Lake, Cumbria

1417 *Dylan S. Ahearn, Joshua H. Viers, Jeffrey F. Mount and Randy A. Dahlgren:* Priming the productivity pump: flood pulse driven trends in suspended algal biomass distribution across a restored floodplain

1434 *G. Carini, J. M. Hughes and S. E. Bunn:* The role of waterholes as 'refugia' in sustaining genetic diversity and variation of two freshwater species in dryland river systems (Western Queensland, Australia)

1447 *Peter C. Schulze, J. Hayley Gillespie, J. Russell Womble and Alexandra F. Silen:* The effect of suspended sediments on Lake Texoma *Daphnia*: field distributions and *in situ* incubations

1458 *Geraldine Nogaro, Florian Mermillod-Blondin, Frederique François- Carcaillet, Jean-Paul Gaudet, Michel Lafont and Janine Gibert:* Invertebrate bioturbation can reduce the clogging of sediment: an experimental study using infiltration sediment columns

1474 *L. Schlüter, T. L. Lauridsen, G. Krogh and T. Jørgensen:* Identification and quantification of phytoplankton groups in lakes using new pigment ratios – a comparison between pigment analysis by HPLC and microscopy

1486 *Timo Muotka, Antti Juntunen and Kristian Meissner:* Differential vulnerability determines the diet of a slow-moving predatory stream insect

1496 *Susana Agustí, Eva Alou, Mark V. Hoyer, Thomas K. Frazer and Daniel E. Canfield:* Cell death in lake phytoplankton communities

1507 *Erika Nilsson, Pia Hertonsson, Marika Stenberg, Jakob Brodersen, Karin Olsson, Patrik Stenroth, Thomas Lakowitz, Christer Brönmark, Per Nyström and Angus R. McIntosh:* Facilitation and interference among three predators affect their consumption of a stream-dwelling mayfly

1515 *Lindsay A. Stallcup, Marcelo Ardón and Catherine M. Pringle:* Does nitrogen become limiting under high-P conditions in detritus-based tropical streams?

1527 *J. M. Elliott:* Critical periods in the life cycle and the effects of a severe spate vary markedly between four species of elmid beetles in a small stream

1543 *I. Petersen, Z. Masters, S. J. Ormerod and A. G. Hildrew:* Sex ratio and maturity indicate the local dispersal and mortality of adult stoneflies

1552 *Keyan Xiao, Dan Yu and Jinwang Wang:* Habitat selection in spatially heterogeneous environments: a test of foraging behaviour in the clonal submerged macrophyte *Vallisneria spiralis*

1560 *Dag O. Hessen:* Determinants of seston C:P-ratio in lakes

1570 *Nathalie Niquil, Gretta Bartoli, Jotaro Urabe, George A. Jackson, Louis Legendre, Christine Dupuy and M. Kumagai:* Carbon steady-state model of the planktonic food web of Lake Biwa, Japan

1586 Book Review

**Volume 51, Issue 9, September 2006**

Original Articles

1589 *Valerie McCarthy, Ian Donohue and Kenneth Irvine:* Field evidence for stoichiometric relationships between zooplankton and N and P availability in a shallow calcareous lake

1605 *William J. Matthews and E. Marsh-Matthews:* Temporal changes in replicated experimental stream fish assemblages: predictable or not?

1623 *Frede Ø. Andersen and Troels Andersen:* Effects of arbuscular mycorrhizae on biomass and nutrients in the aquatic plant *Littorella uniflora*

1634 *Tanya J. Blakely, Jon S. Harding, Angus R. McIntosh and Michael J. Winterbourn:* Barriers to the recovery of aquatic insect communities in urban streams

1646 *Jeffrey D. Jack, Wei Fang and James H. Thorp:* Vertical, lateral and longitudinal movement of zooplankton in a large river

1655 *V. Gulis, V. Ferreira and M. A. S. Graça:* Stimulation of leaf litter decomposition and associated fungi and invertebrates by moderate eutrophication: implications for stream assessment

1670 *B. H. Hill, C. M. Elonen, T. M. Jicha, A. M. Cotter, A. S. Trebitz and N. P. Danz:* Sediment microbial enzyme activity as an indicator of nutrient limitation in Great Lakes coastal wetlands

1684 *Michael J. Paul, Judy L. Meyer and Carol A. Couch:* Leaf breakdown in streams differing in catchment land use

1696 *Jim R. Muirhead, J. Ejsmont-Karabin and Hugh J. MacIsaac:* Quantifying rotifer species richness in temperate lakes

Applied Issues

1710 *David Dudgeon:* The impacts of human disturbance on stream benthic invertebrates and their drift in North Sulawesi, Indonesia

1730 *Nicolas Lamouroux, Jean-Michel Olivier, Hervé Capra, Marc Zylberblat, Andre Chandesris and Pascal Roger:* Fish community changes after minimum flow increase: testing quantitative predictions in the Rhône River at Pierre-Bénite, France

1744 *P. Abellán, D. T. Bilton, A. Millán, D. Sánchez-Fernández and P. M. Ramsay:* Can taxonomic distinctness assess anthropogenic impacts in inland waters? A case study from a Mediterranean river basin

1757 *Daniel Hering, Richard K. Johnson, Sandra Kramm, Stefan Schmutz, Krzysztof Szoszkiewicz and Piet F. M. Verdonschot:* Assessment of European streams with diatoms, macrophytes, macroinvertebrates and fish: a comparative metric-based analysis of organism response to stress

1786 Book Reviews

**Volume 51, Issue 10, October 2006**

Original Articles

1789 *Mark Pyron, Thomas E. Lauer and James R. Gammon:* Stability of the Wabash River fish assemblages from 1974 to 1998

1798 *G. Madgwick, I. D. Jones, S. J. Thackeray, J. A. Elliott and H. J. Miller:* Phytoplankton communities and antecedent conditions: high resolution sampling in Esthwaite Water

1811 *S. Mažeika P. Sullivan, Mary C. Watzin and W. Cully Hession:* Influence of stream geomorphic condition on fish communities in Vermont, U.S.A.

1827 *Sandra L. Cooke, Craig E. Williamson and Jasmine E. Saros:* How do temperature, dissolved organic matter and nutrients influence the response of *Leptodiaptomus ashlandi* to UV radiation in a subalpine lake?

1838 *Jürgen Marxsen:* Bacterial production in the carbon flow of a central European stream, the Breitenbach

1862 *Gui H. Liu, Wei Li, En H. Li, Long Y. Yuan and Anthony J. Davy:* Landscape-scale variation in the seed banks of floodplain wetlands with contrasting hydrology in China

1879 *Jani Heino and Risto Virtanen:* Relationships between distribution and abundance vary with spatial scale and ecological group in stream bryophytes

1890 *Thomas G. D'Souza and Nico K. Michiels:* Genetic signatures of occasional sex in parthenogenetic subpopulations of the freshwater planarian *Schmidtea polychroa*

1901 *Chad W. Hargrave, Raul Ramirez, Melody Brooks, Michael A. Eggleton, Katherine Sutherland, Raelynn Deaton and Heather Galbraith:* Indirect food web interactions increase growth of an algivorous stream fish

1911 *Xuejia He and Wen-Xiong Wang:* Relative importance of inefficient feeding and consumer excretion to organic carbon flux from *Daphnia*

Applied Issues

1924 *R. T. Clarke and J. F. Murphy:* Effects of locally rare taxa on the precision and sensitivity of RIVPACS bioassessment of freshwaters

1941 *B. J. Mattsson and R. J. Cooper:* Louisiana waterthrushes (*Seiurus motacilla*) and habitat assessments as cost-effective indicators of instream biotic integrity

1959 *Robert M. Northington and Anne E. Hershey:* Effects of stream restoration and wastewater treatment plant effluent on fish communities in urban streams

1974 *Masaki Sakamoto, Kwang-Hyeon Chang and Takayuki Hanazato:* Inhibition of development of anti-predator morphology in the small cladoceran *Bosmina* by an insecticide: impact of an anthropogenic chemical on prey–predator interactions

1984 Book Reviews

**Volume 51, Issue 11, November 2006**

Original Articles

1987 *Dag O. Hessen and Eva Leu:* Trophic transfer and trophic modification of fatty acids in high Arctic lakes

1999 *Lizandro Sanabria-Aranda, Adriana González-Bermúdez, Néstor Ned Torres, Cástor Guisande, Ana Manjarrés-Hernández, Vanessa Valoyes-Valois, Jhon Díaz-Olarte, Camilo Andrade-Sossa and Santiago R. Duque:* Predation by the tropical plant Utricularia foliosa

2009 *Scott A. Wissinger, Angus R. McIntosh and Hamish S. Greig:* Impacts of introduced brown and rainbow trout on benthic invertebrate communities in shallow New Zealand lakes

2029 *D. L. W. Young, M. D. Wiegand, N. L. Loadman, S. A. Collins, A. J. Ballevona and J. D. Huebner:* Effects of artificial ultraviolet-B radiation on growth and fatty acid composition of duckweed (*Lemna minor*)

2041 *Marie-Elodie Perga, Martin Kainz, Blake Matthews and Asit Mazumder:* Carbon pathways to zooplankton: insights from the combined use of stable isotope and fatty acid biomarkers

2052 *Winsor H. Lowe, Gene E. Likens and Bradley J. Cosentino:* Self-organisation in streams: the relationship between movement behaviour and body condition in a headwater salamander

2063 *B. J. A. Pollux, M. De Jong, A. Steegh, N. J. Ouborg, J. M. Van Groenendael and M. Klaassen:* The effect of seed morphology on the potential dispersal of aquatic macrophytes by the common carp (*Cyprinus carpio*)

2072 *Nathan R. Franssen, Keith B. Gido, Christopher S. Guy, Jeff A. Tripe, Sally J. Shrank, Timothy R. Strakosh, Katie N. Bertrand, Courtney M. Franssen, Kristen L. Pitts and Craig P. Paukert:* Effects of floods on fish assemblages in an intermittent prairie stream

2087 *Marcia Kyle, Kumud Acharya, Lawrence J. Weider, Karen Looper and James J. Elser:* Coupling of growth rate and body stoichiometry in *Daphnia*: a role for maintenance processes?

2096 *Per Nyström, Patrik Stenroth, Niklas Holmqvist, Olof Berglund, Per Larsson and Wilhelm Granéli:* Crayfish in lakes and streams: individual and population responses to predation, productivity and substratum availability

2114 *Todd Wellnitz and N. LeRoy Poff:* Herbivory, current velocity and algal regrowth: how does periphyton grow when the grazers have gone?

Applied Issues

2124 *Susanne Lildal Amsinck, Agnieszka Strzelczak, Rikke Bjerring, Frank Landkildehus, Torben L. Lauridsen, Kirsten Christoffersen and Erik Jeppesen:* Lake depth rather than fish planktivory determines cladoceran community structure in Faroese lakes – evidence from contemporary data and sediments

2143 *Michele A. Burford, Karen L. McNeale and Fiona J. McKenzie-Smith:* The role of nitrogen in promoting the toxic cyanophyte Cylindrospermopsis raciborskii in a subtropical water reservoir

2154 *Christoph D. Matthaei, Florian Weller, David W. Kelly and Colin R. Townsend:* Impacts of fine sediment addition to tussock, pasture, dairy and deer farming streams in New Zealand

Opinion

2173 *Bernhard Statzner, Nicolas Lamouroux, Vladimir Nikora and Pierre Sagnes:* The debate about drag and reconfiguration of freshwater macrophytes: comparing results obtained by three recently discussed approaches

2184 Book Reviews

**Volume 51, Issue 12, December 2006**

Original Articles

2187 *Claus-Peter Stelzer:* Competition between two planktonic rotifer species at different temperatures: an experimental test

2200 *Meryem Beklioglu, Murat Telli and Ayse G. Gozen:* Fish and mucus-dwelling bacteria interact to produce a kairomone that induces diel vertical migration in *Daphnia*

2207 *Alastair M. Suren and Ian G. Jowett:* Effects of floods versus low flows on invertebrates in a New Zealand gravel-bed river

2228 *Elisa Piña-Ochoa, Miguel Alvarez-Cobelas, Maria A. Rodrigo, Carmen Rojo and Antonio Delgado:* Nitrogen sedimentation in a lake affected by massive nitrogen inputs: autochthonous versus allochthonous effects

2240 *Debra S. Finn and Peter H. Adler:* Population genetic structure of a rare high-elevation black fly, *Metacnephia coloradensis*, occupying Colorado lake outlet streams

2252 *Tuula Larmola, Jukka Alm, Sari Juutinen, Dorothea Koppisch, Jürgen Augustin, Pertti J. Martikainen and Jouko Silvola:* Spatial patterns of litter decomposition in the littoral zone of boreal lakes

2265 *Isabel Domingos, José Lino Costa and Maria José Costa:* Factors determining length distribution and abundance of the European eel, *Anguilla anguilla*, in the River Mondego (Portugal)

2282 *P. R. Lind, B. J. Robson and B. D. Mitchell:* The influence of reduced flow during a drought on patterns of variation in macroinvertebrate assemblages across a spatial hierarchy in two lowland rivers

2296 *Eva Leu, Per J. Færøvig and Dag O. Hessen:* UV effects on stoichiometry and PUFAs of *Selenastrum capricornutum* and their consequences for the grazer *Daphnia magna*

2309 *S. K. Wu, P. Xie, G. D. Liang, S. B. Wang and X. M. Liang:* Relationships between microcystins and environmental parameters in 30 subtropical shallow lakes along the Yangtze River, China

2320 *Thomas C. Jensen, Thomas R. Anderson, Martin Daufresne and Dag O. Hessen:* Does excess carbon affect respiration of the rotifer *Brachionus calyciflorus* Pallas?

2334 *Kay Van Damme and Henri J. Dumont:* Sex in a cyclical parthenogen: mating behaviour of *Chydorus sphaericus* (Crustacea; Branchiopoda; Anomopoda)

2347 *Steven R. Beaty, Kenneth Fortino and Anne E. Hershey:* Distribution and growth of benthic macroinvertebrates among different patch types of the littoral zones of two arctic lakes

2362 *Mark P. Miller, Dana E. Weigel and Karen E. Mock:* Patterns of genetic structure in the endangered aquatic gastropod *Valvata utahensis* (Mollusca: Valvatidae) at small and large spatial scales

2376 *Jost Borcherding, Simone Murawski and Hartmut Arndt:* Population ecology, vertical migration and feeding of the Ponto-Caspian invader *Hemimysis anomala* in a gravel-pit lake connected to the River Rhine
